

Parties to the Statute of the International Court of Justice and States that the General Assembly decides specially to invite, to participate in the Conference;

5. *Invites* the specialized agencies, the International Atomic Energy Agency, the Committee on Space Research of the International Council of Scientific Unions and intergovernmental space organizations to attend the Conference as observers;

6. *Requests* the Secretary-General, with the assistance of the Chairman of the Committee on the Peaceful Uses of Outer Space and the panel of experts within its terms of reference, and in co-operation with the interested specialized agencies, to make, within the ceiling of expenditure established for the Conference, the necessary organizational and administrative arrangements;

7. *Requests* the Committee on the Peaceful Uses of Outer Space to submit to the General Assembly at its twenty-second session a report on the preparations for, and the organization and proceedings of, the Conference.

*1499th plenary meeting,  
19 December 1966.*

**2222 (XXI). Treaty on Principles Governing the Activities of States in the Exploration and Use of Outer Space, including the Moon and Other Celestial Bodies**

*The General Assembly,*

*Having considered* the report of the Committee on the Peaceful Uses of Outer Space covering its work during 1966,<sup>10</sup> and in particular the work accomplished by the Legal Sub-Committee during its fifth session, held at Geneva from 12 July to 4 August and at New York from 12 September to 16 September,

*Noting further* the progress achieved through subsequent consultations among States Members of the United Nations,

*Reaffirming* the importance of international co-operation in the field of activities in the peaceful exploration and use of outer space, including the Moon and other celestial bodies, and the importance of developing the rule of law in this new area of human endeavour,

1. *Commends* the Treaty on Principles Governing the Activities of States in the Exploration and Use of Outer Space, including the Moon and Other Celestial Bodies, the text of which is annexed to the present resolution;

2. *Requests* the Depositary Governments to open the Treaty for signature and ratification at the earliest possible date;

3. *Expresses its hope* for the widest possible adherence to this Treaty;

4. *Requests* the Committee on the Peaceful Uses of Outer Space:

(a) To continue its work on the elaboration of an agreement on liability for damages caused by the launching of objects into outer space and an agreement on assistance to and return of astronauts and space vehicles, which are on the agenda of the Committee;

(b) To begin at the same time the study of questions relative to the definition of outer space and the utilization of outer space and celestial bodies, including the various implications of space communications;

(c) To report on the progress of its work to the General Assembly at its twenty-second session.

*1499th plenary meeting,  
19 December 1966.*

**ANNEX**

**Treaty on Principles Governing the Activities of States in the Exploration and Use of Outer Space, including the Moon and Other Celestial Bodies**

*The States Parties to this Treaty,*

*Inspired* by the great prospects opening up before mankind as a result of man's entry into outer space,

*Recognizing* the common interest of all mankind in the progress of the exploration and use of outer space for peaceful purposes,

*Believing* that the exploration and use of outer space should be carried on for the benefit of all peoples irrespective of the degree of their economic or scientific development,

*Desiring* to contribute to broad international co-operation in the scientific as well as the legal aspects of the exploration and use of outer space for peaceful purposes,

*Believing* that such co-operation will contribute to the development of mutual understanding and to the strengthening of friendly relations between States and peoples,

*Recalling* resolution 1962 (XVIII), entitled "Declaration of Legal Principles Governing the Activities of States in the Exploration and Use of Outer Space", which was adopted unanimously by the United Nations General Assembly on 13 December 1963,

*Recalling* resolution 1884 (XVIII), calling upon States to refrain from placing in orbit around the Earth any objects carrying nuclear weapons or any other kinds of weapons of mass destruction or from installing such weapons on celestial bodies, which was adopted unanimously by the United Nations General Assembly on 17 October 1963,

*Taking account* of United Nations General Assembly resolution 110 (II) of 3 November 1947, which condemned propaganda designed or likely to provoke or encourage any threat to the peace, breach of the peace or act of aggression, and considering that the aforementioned resolution is applicable to outer space,

*Convinced* that a Treaty on Principles Governing the Activities of States in the Exploration and Use of Outer Space, including the Moon and Other Celestial Bodies, will further the purposes and principles of the Charter of the United Nations,

*Have agreed* on the following:

*Article I*

The exploration and use of outer space, including the Moon and other celestial bodies, shall be carried out for the benefit and in the interests of all countries, irrespective of their degree of economic or scientific development, and shall be the province of all mankind.

Outer space, including the Moon and other celestial bodies, shall be free for exploration and use by all States without discrimination of any kind, on a basis of equality and in accordance with international law, and there shall be free access to all areas of celestial bodies.

There shall be freedom of scientific investigation in outer space, including the Moon and other celestial bodies, and States shall facilitate and encourage international co-operation in such investigation.

*Article II*

Outer space, including the Moon and other celestial bodies, is not subject to national appropriation by claim of sovereignty, by means of use or occupation, or by any other means.

*Article III*

States Parties to the Treaty shall carry on activities in the exploration and use of outer space, including the Moon and other celestial bodies, in accordance with international law, including the Charter of the United Nations, in the interest

<sup>10</sup> *Ibid.*, document A/6431.

of maintaining international peace and security and promoting international co-operation and understanding.

#### Article IV

States Parties to the Treaty undertake not to place in orbit around the Earth any objects carrying nuclear weapons or any other kinds of weapons of mass destruction, install such weapons on celestial bodies, or station weapons in outer space in any other manner.

The Moon and other celestial bodies shall be used by all States Parties to the Treaty exclusively for peaceful purposes. The establishment of military bases, installations and fortifications, the testing of any type of weapons and the conduct of military manoeuvres on celestial bodies shall be forbidden. The use of military personnel for scientific research or for any other peaceful purposes shall not be prohibited. The use of any equipment or facility necessary for peaceful exploration of the Moon and other celestial bodies shall also not be prohibited.

#### Article V

States Parties to the Treaty shall regard astronauts as envoys of mankind in outer space and shall render to them all possible assistance in the event of accident, distress, or emergency landing on the territory of another State Party or on the high seas. When astronauts make such a landing, they shall be safely and promptly returned to the State of registry of their space vehicle.

In carrying on activities in outer space and on celestial bodies, the astronauts of one State Party shall render all possible assistance to the astronauts of other States Parties.

States Parties to the Treaty shall immediately inform the other States Parties to the Treaty or the Secretary-General of the United Nations of any phenomena they discover in outer space, including the Moon and other celestial bodies, which could constitute a danger to the life or health of astronauts.

#### Article VI

States Parties to the Treaty shall bear international responsibility for national activities in outer space, including the Moon and other celestial bodies, whether such activities are carried on by governmental agencies or by non-governmental entities, and for assuring that national activities are carried out in conformity with the provisions set forth in the present Treaty. The activities of non-governmental entities in outer space, including the Moon and other celestial bodies, shall require authorization and continuing supervision by the appropriate State Party to the Treaty. When activities are carried on in outer space, including the Moon and other celestial bodies, by an international organization, responsibility for compliance with this Treaty shall be borne both by the international organization and by the States Parties to the Treaty participating in such organization.

#### Article VII

Each State Party to the Treaty that launches or procures the launching of an object into outer space, including the Moon and other celestial bodies, and each State Party from whose territory or facility an object is launched, is internationally liable for damage to another State Party to the Treaty or to its natural or juridical persons by such object or its component parts on the Earth, in air space or in outer space, including the Moon and other celestial bodies.

#### Article VIII

A State Party to the Treaty on whose registry an object launched into outer space is carried shall retain jurisdiction and control over such object, and over any personnel thereof, while in outer space or on a celestial body. Ownership of objects launched into outer space, including objects landed or constructed on a celestial body, and of their component parts, is not affected by their presence in outer space or on a celestial body or by their return to the Earth. Such objects or component parts found beyond the limits of the State Party to the Treaty on whose registry they are carried shall be returned to that State Party, which shall, upon request, furnish identifying data prior to their return.

#### Article IX

In the exploration and use of outer space, including the Moon and other celestial bodies, States Parties to the Treaty shall be guided by the principle of co-operation and mutual assistance and shall conduct all their activities in outer space, including the Moon and other celestial bodies, with due regard to the corresponding interests of all other States Parties to the Treaty. States Parties to the Treaty shall pursue studies of outer space, including the Moon and other celestial bodies, and conduct exploration of them so as to avoid their harmful contamination and also adverse changes in the environment of the Earth resulting from the introduction of extraterrestrial matter and, where necessary, shall adopt appropriate measures for this purpose. If a State Party to the Treaty has reason to believe that an activity or experiment planned by it or its nationals in outer space, including the Moon and other celestial bodies, would cause potentially harmful interference with activities of other States Parties in the peaceful exploration and use of outer space, including the Moon and other celestial bodies, it shall undertake appropriate international consultations before proceeding with any such activity or experiment. A State Party to the Treaty which has reason to believe that an activity or experiment planned by another State Party in outer space, including the Moon and other celestial bodies, would cause potentially harmful interference with activities in the peaceful exploration and use of outer space, including the Moon and other celestial bodies, may request consultation concerning the activity or experiment.

#### Article X

In order to promote international co-operation in the exploration and use of outer space, including the Moon and other celestial bodies, in conformity with the purposes of this Treaty, the States Parties to the Treaty shall consider on a basis of equality any requests by other States Parties to the Treaty to be afforded an opportunity to observe the flight of space objects launched by those States.

The nature of such an opportunity for observation and the conditions under which it could be afforded shall be determined by agreement between the States concerned.

#### Article XI

In order to promote international co-operation in the peaceful exploration and use of outer space, States Parties to the Treaty conducting activities in outer space, including the Moon and other celestial bodies, agree to inform the Secretary-General of the United Nations as well as the public and the international scientific community, to the greatest extent feasible and practicable, of the nature, conduct, locations and results of such activities. On receiving the said information, the Secretary-General of the United Nations should be prepared to disseminate it immediately and effectively.

#### Article XII

All stations, installations, equipment and space vehicles on the Moon and other celestial bodies shall be open to representatives of other States Parties to the Treaty on a basis of reciprocity. Such representatives shall give reasonable advance notice of a projected visit, in order that appropriate consultations may be held and that maximum precautions may be taken to assure safety and to avoid interference with normal operations in the facility to be visited.

#### Article XIII

The provisions of this Treaty shall apply to the activities of States Parties to the Treaty in the exploration and use of outer space, including the Moon and other celestial bodies, whether such activities are carried on by a single State Party to the Treaty or jointly with other States, including cases where they are carried on within the framework of international intergovernmental organizations.

Any practical questions arising in connexion with activities carried on by international intergovernmental organizations in the exploration and use of outer space, including the Moon and other celestial bodies, shall be resolved by the States Parties to the Treaty either with the appropriate international

organization or with one or more States members of that international organization, which are Parties to this Treaty.

#### Article XIV

1. This Treaty shall be open to all States for signature. Any State which does not sign this Treaty before its entry into force in accordance with paragraph 3 of this article may accede to it at any time.

2. This Treaty shall be subject to ratification by signatory States. Instruments of ratification and instruments of accession shall be deposited with the Governments of the Union of Soviet Socialist Republics, the United Kingdom of Great Britain and Northern Ireland and the United States of America, which are hereby designated the Depositary Governments.

3. This Treaty shall enter into force upon the deposit of instruments of ratification by five Governments including the Governments designated as Depositary Governments under this Treaty.

4. For States whose instruments of ratification or accession are deposited subsequent to the entry into force of this Treaty, it shall enter into force on the date of the deposit of their instruments of ratification or accession.

5. The Depositary Governments shall promptly inform all signatory and acceding States of the date of each signature, the date of deposit of each instrument of ratification of and accession to this Treaty, the date of its entry into force and other notices.

6. This Treaty shall be registered by the Depositary Governments pursuant to Article 102 of the Charter of the United Nations.

#### Article XV

Any State Party to the Treaty may propose amendments to this Treaty. Amendments shall enter into force for each State Party to the Treaty accepting the amendments upon their acceptance by a majority of the States Parties to the Treaty and thereafter for each remaining State Party to the Treaty on the date of acceptance by it.

#### Article XVI

Any State Party to the Treaty may give notice of its withdrawal from the Treaty one year after its entry into force by written notification to the Depositary Governments. Such withdrawal shall take effect one year from the date of receipt of this notification.

#### Article XVII

This Treaty, of which the Chinese, English, French, Russian and Spanish texts are equally authentic, shall be deposited in the archives of the Depositary Governments. Duly certified copies of this Treaty shall be transmitted by the Depositary Governments to the Governments of the signatory and acceding States.

IN WITNESS WHEREOF the undersigned, duly authorized, have signed this Treaty.

### 2223 (XXI). Report of the Committee on the Peaceful Uses of Outer Space

#### The General Assembly,

Recalling its resolution 2130 (XX) of 21 December 1965 entitled "International co-operation in the peaceful uses of outer space", which was adopted unanimously,

Having considered the report of the Committee on the Peaceful Uses of Outer Space,<sup>12</sup>

<sup>11</sup> The Treaty was signed in London, Moscow and Washington on 27 January 1967.

<sup>12</sup> Official Records of the General Assembly, Twenty-first Session, Annexes, agenda items 30, 89 and 91, document A/6431.

Reaffirming the common interest of mankind in furthering the exploration and use of outer space for peaceful purposes,

Recalling its resolution 1721 B (XVI) of 20 December 1961, in which it expressed the belief that the United Nations should provide a focal point for international co-operation in the peaceful exploration and use of outer space,

Believing that the benefits of space exploration can be extended to States at all stages of economic and scientific development only if Member States conduct their space programmes in a manner designed to promote the maximum international co-operation and engage in the widest possible exchange of information in this field,

1. Endorses the recommendations contained in the report of the Committee on the Peaceful Uses of Outer Space concerning exchange of information, encouragement of international programmes, international sounding rocket launching facilities, and education and training;

2. Welcomes the intention of the Committee on the Peaceful Uses of Outer Space to increase the usefulness of its activities in the exchange of information on outer space matters by preparing expanded reports annually on a specific date;

3. Notes with appreciation that a number of Member States have assisted the information programme of the Committee on the Peaceful Uses of Outer Space by providing ample descriptive material on their national space programmes, and urges all Member States to provide this information to the greatest extent feasible and practicable;

4. Welcomes the decision of the Committee on the Peaceful Uses of Outer Space to establish a working group to consider the need, feasibility and implementation of a navigation services satellite system;

5. Reiterates its request, contained in section III, paragraph 1, of resolution 2130 (XX), to the Committee on the Peaceful Uses of Outer Space to continue, in co-operation with the Secretary-General and making use of the available resources of the Secretariat and in consultation with the specialized agencies and in co-operation with the Committee on Space Research, the preparation and consideration of suggestions for programmes of education and training of specialists in the peaceful uses of outer space to assist the developing countries;

6. Expresses the desire that these considerations be reported upon to the General Assembly at its twenty-second session;

7. Endorses the guidelines adopted by the Committee on the Peaceful Uses of Outer Space to be applied where international support or sponsorship is requested for the training of specialists of Member States in the specialized fields of space science and technology;

8. Urges that space activities be carried out in such a manner that States may share in the adventure and the practical benefits of space exploration, regardless of the stage of their economic or scientific development;

9. Commends the co-operative space programmes in effect between many Member States and recommends such programmes to the attention of others;

10. Notes with appreciation that certain Member States have continued to contribute to the objectives of the Committee on the Peaceful Uses of Outer Space, as laid down in its reports, by establishing and
